Bugsy *aka* Fingertail Love Hugs

Sire: Fingertail Tango de Rich Kennel

Dam: Fingertail's Dame Edna

Date of Birth: 6/20/1993

Age at Death: 10 years

Cause of Death: Blockage of abdominal aorta

Owner: Andrea Bialoblocki

Breeder: Jo Ann Webster

Bugsy came to us in 1996 from people who no longer wanted him. He was a rescue before we had rescue. He was abused, overweight, tied to a tree all day, and fear aggressive. We worked hard with his problems, and many times he was almost on his way to the vets, after biting Tom again. My heart went out for the old Bugger Boy - it was not his fault he was the way he was. He ended up staying with us until he died. He settled in his age, getting grey and slow, he learned to listen, to behave and to be a love. He suffered from Mange, Lyme disease and had growths on his eyelids. The sad day came when he was unable to stand and we found a blockage of his abdominal aorta. For Bugsy - he would not be able to handle the humiliation of no longer being independent. Bugsy left us on April 2, 2003. He will be missed
